Retail Sales Performance Dashboard

Data Analysis Project | Microsoft Excel

Project Overview

Interactive Dashboard

Built inMicrosoftExcel to analyze retail sales performance with actionable insights

Business-Driven Analysis

Transformedraw salesdata into clear, actionable insights for strategic decision-making

Excel Proficiency

Demonstratedexpertise in data cleaning, analysis, and visualization using Excel tools

Business Problem

Limited Visibility

Retailbusiness lacked clear understanding of sales trends, product performance, and customer behavior patterns

Missing Insights

Difficultyidentifyingkey sales drivers and pinpointing specific areas requiring improvement or optimization

Need for Centralization

Requireda centralized,easy-to-understand tool to monitor and analyze sales data effectively

Dataset Description

Data Source

Transactional sales data from retail outlet

File Format

Raw CSV file with 10,000+ transactions

Key Fields

- Order ID
- Date
- Product Name
- Product Category
- Quantity Sold
- Unit Price
- Total Revenue

Data Cleaning & Feature Engineering

01

Data Cleaning Process

- Converted raw CSVdataset into Excel table
- Fixed date formatting issues
- Ensured correct data types (Date, Currency)

02

Feature Engineering

- Created'OrderYear' and 'Order Month' from Date field
- Calculated 'Total Revenue' (Quantity × Unit Price)
- Enhanced dataset for deeper analysis

Analysis Process: Pivot Tables & Charts

Pivot Tables

Aggregated sales by Category, Product, and Time

Pivot Charts

Visualizedtrends and distributions

Key Metrics

Revenue,UnitsSold, Orders

Visualizations Used

- Monthly Sales Performance (Line Chart)
- Category-wise Sales (Pie Chart)
- Best-Selling Products (Bar Chart)

Key Metrics

Total Revenue, Total Units Sold, Number of Orders calculated and analyzed

Dashboard Development

Tool
Microsoft Excel

Layout
Single-page, interactive dashboard

KPIs
TotalRevenue, Units Sold, Orders

Interactivity
SlicersforDate,Category, Size

Key Insights

1

Top Performing Sub-Category

Copiers is the most profitable product sub-category

2

Top Performing Region

Centralregiongeneratedthehighest sales and profit

3

Yearly Performance

2014recordedthehighestyearly sales performance

4

Seasonal Impact

Decemberisthehighest revenue month due to seasonal demand

Business Recommendations

1 Investment Management

Increaseinvestmentinhigh-performing regions

2 Marketing Focus

Allocatebudgettowards promoting underperforming categories during peak seasons or explore bundling strategies

3 Inventory Management

Prepareinventoryforhigh-demand months

4 Further Analysis

Investigateloss-making products
